Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 21-23 rejected under 35 U.S.C. 102(b) as being anticipated by Kino JP 2000159254.

Kino '254 teaches, in the embodiment of figure 2, teaches a lid having a top wall, a recessed central portion, a drink opening, a retaining element, and a closure element.

Examiner notes that the top wall is read to be the portion of the top that is inbetween the recessed central portion and the sidewall. Because the spout is located radially inwardly of this portion, it is read to be "within" the top wall.

Regarding the lid being used for a container for a flowable substance, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8-11 and 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kino JP 2000159254.

Regarding claims 8-11, Kino '254 teaches, in the embodiment of figure 2, teaches a lid having a top wall, a recessed central portion, a drink opening, a retaining element, and a closure element, but fails

Art Unit: 3727

to teach the retaining element being disposed 45 degrees from the drink opening. It would be desirable to locate the retaining element closer to the drink opening in order to reduce the distance required for a user to displace the closure element when moving it between the two locations.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the closure of Kino '254, placing the retaining element 45 degrees from the drink opening, because it has been held that rearranging parts of an invention involves only routine skill in the art. *In re Japikse*, 86 USPQ 70. One would further be motivated to move the retaining element to a position 45 degrees from the drink opening in order to reduce the distance required for a user to displace the closure element when moving it between the two locations.

Regarding claims 19-20, Kino '254 fails to teach a second retaining element.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the closure of Kino '254, providing a second retaining element, because it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

Allowable Subject Matter

5. Claims 1-7 and 12-18 are allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3727

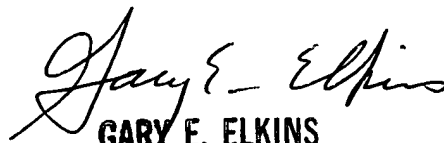

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
